SKILLS

Product & growth

Product strategy · PRDs · Roadmap
prioritisation · Marketplace design · Pricing · Unit economics · Cohort segmentation · Funnel analysis · CAC and ROAS · Attribution

GTM & commercial

Go-to-market · Partnerships · Contract negotiation · Enterprise accounts (India, Saudi Arabia) · B2B SaaS · FMCG distribution · QSR · Logistics · WhatsApp Business API

Technical

SQL / PostgreSQL · Metabase · Python · TypeScript · React · Jira · Release management · AI coding assistants · Agent systems (Claude Agent SDK, MCP) · LLM cost governance

PROJECTS

MilkoReach — ordering app for a partner brand

2026 · built with an AI coding assistant
Retailers near Kapila's distributors were not ordering. Built an assisted-ordering app in an evening; real purchase orders two days later. **Idea to first delivery in 17 days; 226 distributors mapped.**

WhatsApp sales agent, first working version

1 Jul 2026 · one sitting
Orchestrator, prompt layer, messaging, auth and policy engine, with a handover document. The AI pod made it production-grade from day three.
Reported ₹11,690 causal revenue where a looser definition allowed ₹3,98,065.

Trial-combo storefront

2026 · failed experiment
A no-install, no-OTP storefront for low-price trial packs of unknown brands. Built end to end; **produced no meaningful orders**. Kept because the friction argument is sound and the result is honest.

SUMMARY

Three years in Indian food and retail commerce, on both the merchant and the distribution side. Ran product, growth and engineering delivery for a team of 20 through a twenty-six-fold ramp in monthly orders, the pivot that followed when the courier model broke on unit economics, and an AI pod that put twenty agent systems into production. I define the value metric before we build, and I report the number that survives an audit.

WORK EXPERIENCE

Product Manager | Badho Technologies, Gurugram

Oct 2025 – Sep 2026

- Product, growth, engineering delivery, QA and the AI pod across a team of 20. Monthly orders 219 → 5,784 over the tenure; 242 releases of three apps from one monorepo; #1 spec author, 489 of 1,585 tickets. Company wound down Sep 2026.
- Badho Wholesale (JIT pivot) — commission marketplace → own-warehouse distributor**
 - Named the retention constraint in numbers (three per-brand minimums on one cart), then owned the operating model: warehouse and software specification, per-brand minimums replaced by a flat ₹75 fee waived above ₹500. **First order live in 12 days**; daily carts in the launch cities 4.5 → 45.5.
- Fulfilment economics — freight legibility, automated courier claims, a returns stack**
 - Two in five courier orders came back and every order lost money. Specified 34 of 42 fulfilment features: **return-to-origin 42.6% → 21.4%**, contribution per order **-₹196 → +₹36** (company P&L), median delivery 10.2 → 6.1 days, p90 28.2 → 10.1.
- WhatsApp acquisition — a channel built from nothing and measured honestly**
 - Seven-cohort exhaustive audience model over 1.17M buyers; **₹9.60 per app install** across 29,172 buyers on same-day attribution; template routing (~7× price gap) and in-house sending (₹0.145 → ₹0.115). Recommended stopping the spend when July ROAS came in at 1.12× against a 13% take rate.
- Delivery-as-a-Service (MOVE IT) — sold to the distributors on our own marketplace**
 - Joint product owner: OCR bill intake, two-party OTP handover, three-hop cash custody, pricing by vehicle class. Trips **259 → 438** quarter on quarter; seller businesses 4 → 43; ~4,100 bookings in 2026 at 73% completion.
- AI & agent programme — program-managed, not built**
 - Owned eleven epics for the four-person pod that shipped **20 production systems**; red-teamed the sales agent before launch; mandated per-model budget alerts. Specified vernacular search: **699,684 learned synonyms** on 32,536 roots.

Product Manager, Founder's Office (part-time) | ONO Suite / DailyKit, Gurugram

Jul 2024 – Sep 2026 · intern
Jan – Jun 2024

- Restaurant technology — self-ordering kiosks, ordering apps, POS integrations — for QSR chains in India and Saudi Arabia.
 - Authored the company pricing architecture (subscription vs ownership buyout, per kiosk / store / chain) and commercials for seven QSR brands; SPOC for a **34-kiosk Taco Bell India** estate with weekly client reporting.
 - Owned the **Herfy** Saudi account single-handed: 79 live kiosks, three renewals, a price rise closed while conceding six of seven legal redlines, a withholding-tax dispute resolved at a 17.65% gross-up.
 - Cold-pitched, scoped and signed **DOKA** (Riyadh, nine branches) at ~\$7,000 under Saudi law; ran delivery to iOS release approval, incl. a five-step build-your-own-cake configurator over a 215-SKU menu.
 - Registered formal partnerships with GoFrugal and Petpooja; working relationships with Reelo, Razorpay, checkout.com, QueueBuster.

Earlier — engineering

2021 – Jun 2024

- Founding Software Engineer, Taxian** (Oct 2023 – Jun 2024): shipped a Flutter app to the Play Store reaching 500+ active users; led a team of five. Before that, full-stack and mobile development for clients in the USA, Canada and India; project team lead at OneAll Digital.
